Individual Contribution Statement

Project: Below the Ember

Student: Bekzat Zhailkhan

Format: Individual project with one student participant

Date prepared: 25 October 2026

Student participation

Bekzat Zhailkhan is the sole student participant. The project owner selected the game direction, requested the implementation and later improvements, and provided feedback about mechanics, AI topics, sound, animation, story and presentation. There are no additional student team members to assign contributions to.

Work areas and assistance

Work area	Contribution and assistance
Project direction	Bekzat Zhailkhan defined and approved the requested product scope and changes.
Implementation	Developed with substantial ChatGPT/Codex coding assistance under the student's direction.
Testing and debugging	AI-assisted tests, browser checks and experiment scripts. Their outputs are included in the project.
Documentation and presentation	AI-assisted drafts, technical explanations, slides and demo preparation. The student is responsible for final review.
Final defense	Bekzat Zhailkhan is responsible for the live demonstration and personal explanation of the algorithms.

This statement does not assign invented work percentages or claim that the student manually wrote every line. AI is a development tool, not a student team member. The separate AI Usage Declaration describes its role.

Student review

The statement records the individual-project format supplied by the student and the assistance visible in the development history. No signature has been applied on the student's behalf.
